

## Information for customers and business partners according to REACH and RoHS regulation

Regulation (EC) 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (**REACH**) regulates the manufacture, placing on the market and use of chemical substances and mixtures thereof.

In accordance with Article 33 of the REACH Regulation, suppliers of articles must inform their customers if the article supplied contains a substance on the REACH candidate list ([SVHC list](#)) in concentrations greater than 0.1% by mass.

ALBROMET GmbH supplies semi-finished products (plates, round bars and tubes) and finished parts made of aluminum bronzes, copper and copper alloys. These are articles within the meaning of the REACH Regulation.

We hereby inform you that **no** ALBROMET product contains more than 0.1% by mass of a substance identified as SVHC.

For the composition and safe handling of our materials, please refer to our information sheets for articles. We will send you safety data sheets on request.

With regard to the RoHS Regulation 2011/65/EU (**RoHS III**) and the Delegated Directive (EU) 2015/863, the products supplied by ALBROMET also comply with the provisions of this regulation. Therefore, these alloys are permitted for use in electrical and electronic equipment and comply with the RoHS Directive.

ALBROMET will continue to review the applicable regulations with its suppliers on a regular basis. If you require further information, please get in touch with your contact person.
