Info ALBROMET 200

ALBROMET 200 has excellent technical properties and is admitted for the food industry, as this material is nickel, tin and lead free. It's a type of the **Green Alloys**.

ALBROMET 200 is approved in the engineering sector, aircraft industry and naval architecture, water industries, as well as in the plastic technology and petrochemistry.

ALBROMET CUTTING CENTER

Whatever size you need: We will fulfill your every wish. Our cutting center, located in Geretsried, provides timely implementation – even for the smallest material cuttings.

ALBROMET PROCESSING SERVICE

From boring to complex 3D contours – ALBROMET realizes processing in both small and large quantities – exactly to your specifications. Through the expertise and experience of ALBROMET, an excellent cost-benefit ratio is achieved.

According to the highest quality standards, we manufacture flanges in special sizes, moldings with special contours as well as rings, sockets, or adapters to your requirements – please contact us about your needs.

We are known for good service, highest competence, and flexibility – and for excellent customer service.

ALBROMET CONSULTANCY

ALBROMET Consultancy: We also help you develop solutions for production systems and end products that can not be realized due to special requirements with conventional materials.

Flat bars / Plates

ALBROMET 200 Flat bar, Horizontal Continuous Cast

**Available also in production lengths á ca. 3650 mm and cutted parts on your demand*

GREEN ALLOYS – ACTIVE ENVIRONMENTAL PROTECTION WITH ALBROMET 200

Green Alloys are materials which contain little or no nickel, tin, or lead, and, therefore, are particularly environmentally friendly both in production as well as in recycling.

Choose the best tribology, service life, environmental protection, and use of resources!

ALBROMET 340 / 380 Plates, cast, premachined	
Sizes mm	Weight kg/m
32 x 800	182,0
40 x 800	227,2
50 x 800	284,0
60 x 800	340,8
80 x 800	454,4
In Production lengths á approx. 1500 mm.	
Also available in cutted pieces on your demand!	

Plates, forged:

**A-200, A-220Ni, A-260Ni
A-300, A-340 and A-380
available in thickness up to 200 mm**
